

DUTCH SCIENTIFIC TECHNOLOGIES

Join the DST Experience!!

Dutch Scientific Technologies

An innovative, creative and multi-disciplinary consultancy and engineering company, covering the complete Innovation, Business Growth and product Life Cycle.

Fully integrated Product Development and Business approach

DST delivers services to kickstart and boost your Product Development Process and Product Portfolio.

DST's Multi-Disciplinary **Concept & Innovation Team** can analyze your products, services, markets and customer base, and create feasible roadmaps with tangible solutions based both on Technology and Market, and can be extended with experts from the fields of interest.

We Innovate your future!

Our top technical team can design and produce: Proof of Concepts, Prototypes and mock-ups, perform external reviews, compliance tests and Feasibility Studies on product and production, including adaptation of Product Life Cycle, and safety analysis (FMEA, FMECA, MTBF) for Aerospace and Defense)

Combined with Customer Experience Analysis such as Total Product Perception, including "Look and Feel" and Use Case Validation, you can make Solid Business Decisions and we can Improve your Product on: Technology, Business and Desirability.

"Seventy percent of the Total Life Cycles Costs are created during the Concept phase"

Consultants of Dutch Scientific Technologies, have a broad experience in: Market, Management, Sales and Customer Development, Customer experience, Technical Design and Architecture, Product Development and Business Processes, Product Life Cycles, Technology Transfer, Production Outsourcing, Certification and more.

We can support you in all Project Phases, and help you to lower costs, improve your products and boost your sales.
